

**Fun fact:** Our platform was not initially built to be sold as a product!

We built the platform a few years back for our own use on our projects as we were getting a lot of forms type work and we didn't like using InfoPath as it had too many limitations. The original version was for SharePoint 2010 and we used it for On-Prem projects for our customers. After InfoPath was deprecated we decided to rebuild it from the ground up using the Office UI Fabric and release it as a product for Office 365 and On-Prem.

# Benefits of Our Platform

Built for:

 Office 365

 SharePoint

### It's not just forms

It contains forms, workflow and business logic in one package.

### Minimal training

As it's built on the SharePoint platform, if you can create sites, lists and columns in SharePoint then you can design forms.

### Responsive by design

Our forms are 100% responsive meaning they work well on any device.

For customer demos, we typically spend 1-2 hours setting up a sample form and the associated business process.

### It's fast

Most forms can be built including automating their business process in less than 4 hours and more complex ones typically take just a few days.

### Mobile app with Offline Forms

We have a companion mobile app for iOS and Android which provides offline forms.

### Continuously improving

We have an aggressive release cycle whereby we release new features every month!

### Unrivalled Support

We provide extensive support through numerous channels including our online Helpcenter, YouTube channel, Community site and Helpdesk (check out our reviews on AppSource).

### Cost effective

Compared to other products we are very inexpensive and offer features that are not available in other products.

- 1 Build faster (apps can be built in hours rather than days or weeks)
- 2 Deploy easier (export the app design and import to live environment)
- 3 Reduce custom code and testing effort
- 4 Reduce complexity
- 5 Easy troubleshooting (via export/import)
- 6 Build on a proven platform
- 7 Monthly updates with new features
- 8 Premium support

## Platform Benefits

## Upcoming Features

### Design wizard

Configure everything in one screen

### Forms Hub

A central location to access all of your forms/apps

### App Themes

Apply consistent branding to all forms/apps across your organisation

### Email approval

Approve and reject forms via email

### Sintel Grid

View your form data in a grid with searching, sorting, filtering, grouping, exporting and custom actions

### Sintel Chart

Visualise your form data using one or more responsive charts

### Sintel Tile

Display key data, metrics and summary information
